

IN THE CLAIMS:

Please cancel Claims 2 to 41 without prejudice or disclaimer of the subject matter recited therein. Claim 1, the only claim remaining in the application, reads as follows:

1. (Original) A photoelectric conversion device comprising at least an electron acceptive charge transfer layer, an electron donative charge transfer layer, and a light absorption layer existing between the charge transfer layers, wherein either one of the charge transfer layers is a semiconductor acicular crystal layer comprising aggregate of acicular crystals.

2 to 41. (Cancelled)
